

Citrus

NUTRITION NOTES

- One small orange (2 $\frac{3}{8}$ inch diameter) counts as $\frac{1}{2}$ cup of fruit.
- Citrus is fat free, sodium free and cholesterol free.
- One small orange contains 45 calories, no fat and 2 grams of fiber.
- Citrus is an excellent source of **vitamin C** (*plays a role in wound healing*).

Citrus includes oranges, lemons, limes, grapefruit, clementine, tangerine and many other fruits. Citrus fruits are nutritious and complement a variety of dishes, from entrees, side dishes and desserts.

USES AND TIPS

Select fruits with firm, smooth skin that are heavy for their size. Avoid those with cuts or soft spots. Store citrus at room temperature for 1-2 days or refrigerate for 1-2 weeks.

Oranges are a delicious and convenient snack, just peel and enjoy! Try adding orange segments to green salads or make a salsa to top chicken or fish. For an intense citrus flavor in recipes, use the zest of any citrus.

SHAKE IT UP! SHAKE IT UP! SHAKE IT UP! SHAKE IT UP!

Did you know?

Orange seeds are called pips.

Oranges are the most consumed citrus fruit in the United States.

The heaviest lemon ever recorded weighed 11 pounds, 9.7 ounces.

Grapefruit were so named because they grow in clusters like grapes.

Citrus was brought to the U.S. by Spanish explorers in 1565.

The major citrus-producing states in the United States are Florida, California, Texas and Arizona. Florida is the largest producer of oranges.
