

Geometry: Concepts & Connections

Geometry: Concepts & Connections is the second course in a sequence of three required high school courses designed to ensure career and college readiness.

When will my student take

Geometry: Concepts & Connections?

Geometry: Concepts & Connections is typically taught in the 10th grade in the Barrow County School System. The pre-requisite for this course is successful completion of Algebra: Concepts & Connections. Students typically move to Advanced Algebra: Concepts & Connections after completing this course.

What do students learn?

This course is intended to enhance students' geometric, algebraic, graphical, and probabilistic reasoning skills.

The Barrow County School system uses an Geometry curriculum developed by [Open Up Resources](#), which is also used for mathematics in the middle grades.

The Open Up High School Mathematics pathway helps students learn by building connections between conceptual understanding, mathematical representations and modeling, and abstract thinking.

How can I help my student?

There are several ways that you can assist your student to be successful in Geometry: Concepts & Connections:

- Encourage your student to attend school each day so that there are no interruptions in the learning process.
- Encourage your student to ask questions before, during, and after class.
- Provide a quiet study area for your student that is free of distractions such as cell phones, televisions, and other electronic devices.
- Encourage your student to reach out to their teacher for extra tutoring or help.

Geometry Resources

Teacher as a Resource

Your student's teacher likely has opportunities for tutoring and additional help. Encourage your student to reach out to the teacher to see what opportunities are available.

Check the course syllabus for any resources that your student's teacher recommends.
